

Year 7 Maths Curriculum Map

Sequencing of topics	What knowledge will students develop? (Including key terminology)	What skills will students develop? (Including literacy & numeracy)	Assessment opportunities	Homework opportunities	Personal development (Ursuline Values, Catholic Social Teaching, Cultural Capital, Cross-curricular, Careers)	Curriculum links
Autumn Term 1						
Algebraic Thinking	<ul style="list-style-type: none"> • Sequence • Linear and non-linear sequences • Function machine • Inverse operations • Substitution • Equality and equivalence 	<ul style="list-style-type: none"> • Move freely between different numerical, algebraic, graphical and diagrammatic representations • Make and test conjectures about patterns and relationships • Use a calculator and other technologies to calculate results accurately and then interpret them appropriately • Generate terms of a sequence from a term-to-term rule • Recognise arithmetic sequences • Recognise geometric sequences and appreciate other sequences that arise 	<ul style="list-style-type: none"> ○ Mid-topic assessment ○ End of topic assessment 	<p>Mathswatch/CorbettMaths/Mathsbox/MathsGenie/MyMaths/Quizizz</p> <p>These include:</p> <ol style="list-style-type: none"> 1. Videos 2. Practice questions 3. Past exam questions 4. Differentiated activities. 5. Opportunities for flipped learning <p>Research opportunities:</p> <ol style="list-style-type: none"> 1. Real-life use of sequences: patterns made when tiling floors; seating people around a table; the rate of change of a population; the spread of a virus etc. 	<p>Grateful for different Mathematicians' contributions to the world.</p> <p>The dignity of work – through looking at important financial issues.</p> <p>United in Harmony</p> <p>Option for the Poor and Vulnerable</p> <p>Stewardship</p> <p>Knowledge of mathematical concepts and problem-solving skills</p> <ul style="list-style-type: none"> • Science • Geography • Physical Education 	<p>Basis for techniques to be explored in GCSE Mathematics</p>

Year 7 Maths Curriculum Map

		<ul style="list-style-type: none"> • Use algebra to generalise the structure of arithmetic, including to formulate mathematical relationships. • Model situations or procedures by translating them into algebraic expressions • Substitute values in expressions, rearrange and simplify expressions • Use and interpret algebraic notation • Simplify and manipulate algebraic expressions to maintain equivalence by collecting like terms • Use approximation through rounding to estimate answers • Use algebraic methods to solve linear equations in one variable 			<ul style="list-style-type: none"> • Mathematician • Data Analyst • Teacher • Engineering • Architecture • Engineering • Photography • Computer Scientist • Operations Research 	
Autumn Term 2 / Spring Term 1						
Place Value and Proportion	<ul style="list-style-type: none"> • Place value • Integers and figures • Number line • Rounding • Inequality notations 	<ul style="list-style-type: none"> • Consolidate their understanding of the number system and place value to include decimals 	<ul style="list-style-type: none"> ○ Mid-topic assessment 	Mathswatch/ CorbettMaths/Mathsbox/Ma thsGenie/MyMaths/Quizizz These include:	Listening and attentive. Family and Community	Basis for techniques to be explored in GCSE Mathematics

Year 7 Maths Curriculum Map

	<ul style="list-style-type: none"> • Order integers • Range • Median • Compare numbers • Significant figure • Powers of 10 • Standard form • Fractions and decimals • Percentages • Algebraic fractions 	<ul style="list-style-type: none"> • Understand and use place values for decimals, measures and integers of any size • Order positive and negative integers, decimals and fractions; use the number line as a model for ordering of the real numbers • Work interchangeable with terminating decimals and their corresponding fractions • Round numbers to an appropriate degree of accuracy • Describe, interpret and compare observed distributions of a single variable through the median and the range • Interpret and compare numbers in standard form • Consolidate their understanding of the number system and place value to include decimals and fractions • Move freely between different numerical representations 	<ul style="list-style-type: none"> ○ End of topic assessment 	<ol style="list-style-type: none"> 1. Videos 2. Practice questions 3. Past exam questions 4. Differentiated activities. 5. Opportunities for flipped learning 	<p>Community and social justice</p> <p>Option for the Poor and Vulnerable</p> <p>Stewardship</p> <p>Knowledge of mathematical concepts</p> <ul style="list-style-type: none"> • Science • Geography • Physical Education • Religious Education • History • Design & Technology • Mathematician • Data Analyst • Teacher • Medicine • Engineering • Architecture • Engineering • Photography • Actuary • Economist 	
--	---	---	---	--	---	--

Year 7 Maths Curriculum Map

		<ul style="list-style-type: none"> • Extend their understanding of the number system; make connections between number relationships • Express one quantity as a fraction of another • Define percentage as a 'number of parts per hundred' • Compare two quantities using percentages • Work with percentages greater than 100% • Interpret pie charts 			<ul style="list-style-type: none"> • Market Research Analyst • 	
Spring Term 2						
Applications of Number	<ul style="list-style-type: none"> • Addition and subtraction • Perimeter • Financial maths • Tables and timetables • Frequency trees • Bar charts and line charts • Standard form • Multiplication and division • Factors • Multiples • Powers of 10 • Convert metric units 	<ul style="list-style-type: none"> • Use formal written methods, applied to positive integers and decimals • Recognise and use relationships between operations including inverse operations derive and apply formulae to calculate and solve problems involving: perimeter • Construct and interpret appropriate tables, charts, and diagrams, including frequency tables, bar charts and 	<ul style="list-style-type: none"> ○ Mid-topic assessment ○ End of topic assessment 	<p>Mathswatch/CorbettMaths/Mathsbox/MathsGenie/MyMaths/Quizizz</p> <p>These include:</p> <ol style="list-style-type: none"> 1. Videos 2. Practice questions 3. Past exam questions 4. Differentiated activities. 5. Opportunities for flipped learning <p>Research opportunities:</p> <ol style="list-style-type: none"> 1. Planning a trip using tables/timetables. 2. Negative numbers in temperature. 	<p>Serviam</p> <p>Generous</p> <p>Grateful</p> <p>Intellectual curiosity and pursuit of knowledge</p> <p>Option for the Poor and Vulnerable</p> <p>Stewardship</p>	<p>Basis for techniques to be explored in GCSE Mathematics</p>

Year 7 Maths Curriculum Map

<ul style="list-style-type: none"> • Order of operations • Area • Mean • Algebraic expressions • Fraction of a given amount • Percentage • Directed numbers • Use of a calculator • Algebraic expressions • Equations • Order of operations • Powers and roots • Fractions 	<p>pictograms for categorical data, and vertical line (or bar) charts for ungrouped numerical data</p> <ul style="list-style-type: none"> • Use formal written methods, applied to positive integers and decimals • Select and use appropriate calculation strategies to solve increasingly complex problems • Recognise and use relationships between operations including inverse operations • Use the concepts and vocabulary factors (or divisors), multiples, common factors, common multiples, highest common factor, lowest common multiple • Change freely between related standard units [time, length, area, volume/capacity, mass] • Derive and apply formulae to calculate and solve problems involving: perimeter 			<ol style="list-style-type: none"> 3. HCF/LCM – Planning events 4. Charts and graphs to represent data collected by students on various topics of interest. E.g. social media platforms. 	<p>Knowledge of mathematical concepts</p> <ul style="list-style-type: none"> • Science • Geography • Physical Education • Religious Education • History • ICT • Mathematician • Data Analyst • Teacher • Medicine • Engineering • Architecture • Engineering • Photography • Actuary • Economist • Market Research Analyst • Accountant • Architect • Scientist • Surveyor •
