

The Next 25: 25 visionaries to watch, nominated by Red's favourite trailblazers

From Michelle Obama to Sharon Horgan...and including our very own **Floriane Fidegnon!**

[The Next 25: 25 visionaries to watch, nominated by Red's favourite trailblazers \(redonline.co.uk\)](https://redonline.co.uk)

We are proud to say that Floriane is a past student (2010 – 2017) and ex Head Girl of Ursuline, who continues to go from strength to strength. She went on to Warwick University to study Engineering; whilst there she was awarded Engineering Student of the Year! Floriane says “If it hadn't of been for the role models I had as a teenager, I would've never had a chance to pursue engineering – so for me, the work I do is to pay it forward and encourage more young people into STEM”. She has regularly come into school to deliver workshops and act as a mentor to our STEM students. Serviam Floriane!

Dr Anne-Marie Imafidon MBE

Computer scientist, social entrepreneur, and founder of Stemettes, a social enterprise promoting women in STEM careers.

Nominee: Floriane Fidegnon, Founder of The Warwick Women's Engineering Society

Anne-Marie says: ‘Floriane is a Stemettes alum who is now chair of our Youth Board and a well-respected engineering policy expert. From her supreme problem-solving and communication skills to her wisdom and balanced approach to dealing with complex concepts, she is a powerhouse: one day we’ll all be working for her.’

Floriane says: ‘We have really big challenges facing us – it will take diverse skillsets and backgrounds to build solutions to climate change, harness the potential of technology and more. It’s a big task and I’m doing my bit by working to bring more diverse groups of people into rooms where critical decisions are being made’.
